

## Decontamination: COVID-19

### Surface products

#### Bleach based products without detergent action

- **E001 Bleach** and **P16003 Liquid Bleach** (dilute 1/45 to achieve 1000ppm active)
- **YC17 C17 sanitising tablets** and **P17007 bleach tablets** (1 tablet in 1 litre water gives 1000ppm active)

#### Bleach based products with detergent action

- **E011 Thick Bleach**, **YJF4 Thick Bleach** and **P16012 Premisan** (dilute 1/45 to achieve 1000ppm active)
- **T025 Spray and Wipe with Bleach** and **P16019 Premisan Plus RTU** (both are ready-to-use products at 10,000ppm active)

#### Products which are effective against enveloped viruses

- **T100 Professional Surface Sanitiser**, **FH55 Pro-Dis** and **T149 Alcohol Spray**: All are ready-to-use disinfectant sprays which are effective against enveloped viruses, including coronavirus, when used at a 1-minute contact time. Pre-clean the surface prior to the disinfection step.
- **C066 Selgiene Ultra**: A 1/25 dilution when used at a 1-minute contact time is effective against enveloped viruses, including coronavirus. A 1/40 dilution when used at a 5-minute contact time is effective against enveloped viruses, including coronavirus. All tests have been performed in medical standard dirty conditions.
- **T066 Selgiene Ultra (RTU)**: A ready-to-use disinfectant spray, which is effective against enveloped viruses, including coronavirus, when used at a 1-minute contact time. Testing has been performed in medical standard dirty conditions.
- **C500 Selgiene Extreme** and **YC01 C1 Defence Cleaner Sanitiser**: A 1/25 dilution when used at a 1-minute contact time is effective against enveloped viruses, including coronavirus. A 1/40 dilution when used at a 5-minute contact time is effective against enveloped viruses, including coronavirus. All tests have been performed in medical standard dirty conditions.
- **T500 Selgiene Extreme (RTU)** and **YC01t C1t RTU Cleaner Sanitiser**: Both are ready-to-use disinfectant sprays, which are effective against enveloped viruses, including coronavirus, when used at a 1-minute contact time. Testing has been performed in medical standard dirty conditions.

## Decontamination: COVID-19

- **P06068 Screen Virucidal Disinfectant:** A 1/25 dilution when used at a 1-minute contact time is effective against enveloped viruses, including coronavirus. A 1/40 dilution when used for a 5-minute contact time is effective against enveloped viruses, including coronavirus. All tests have been performed in medical standard dirty conditions.
- **P06067 Screen Virucidal Disinfectant Spray:** A ready-to-use disinfectant spray, which is effective against enveloped viruses, including coronavirus, when used at a 1-minute contact time. Testing has been performed in medical standard dirty conditions.
- **P11578 Ecoforce Disinfectant unfragranced:** A ready-to-use disinfectant spray, which is effective against enveloped viruses, including coronavirus, when used at a 1-minute contact time. Testing has been performed in medical standard dirty conditions.
- **V500 Bactericidal Kitchen Cleaner, YC01s C1s Super Concentrate Cleaner Sanitiser, YC01x C1x Super Concentrate Cleaner Sanitiser and P18151 E50 Super Concentrated unperfumed sanitiser:** A 1/20 dilution when used for a 5-minute contact time is effective against Norovirus. Norovirus is a non-enveloped virus which is much harder to inactivate compared to enveloped viruses, and therefore it can be expected this dilution and contact time will be effective against coronavirus. Pre-clean the surface with the product prior to the disinfection step.
- **M500 Selgiene Virucidal Wipes:** Ready-to-use disinfectant wipes which are effective against enveloped viruses, including coronavirus, in 1 minute. Testing has been performed in medical standard dirty conditions.

## Hand decontamination

- **C053 Alcohol Hand Rub Sanitiser and SO53 So Sterile:** Alcohol hand rub containing >70% (v/v) ethanol. This level of alcohol has been deemed appropriate by Public Health England for COVID-19 decontamination. The products conform to BS EN 1500, BS EN 1276 and most recently BS EN 14476, effective against enveloped viruses in 30 seconds. Apply a palm sized amount to hands and rub until dry.
- We supply a range of hand soaps for frequent hand washing, including **C032 So Hygienic** and **C038 Pink Pearl**. Ensure hands are washed well for at least 20 seconds.
